

Reaction Time

You need to know:

Stopping distance = thinking distance + braking distance

Do this:

- Set the speed dial to 20 mph
- Set the road conditions to dry
- Press the **yellow Reset** button
- Press the **green Start** button.
- The hazard light will start to flash. When it stops flashing, press the **red Stop** button.
- Record your thinking time, thinking distance and braking distance.
- Work out your stopping distance.
